REPORT OF THE FUND MANAGEMENT COMPANY

I. GENERAL INFORMATION OF THE FUND

1. Investment objective

VCBF Tactical Balanced Fund ("the Fund") was established as an open-ended fund in Vietnam pursuant to Initial Public Offering Certificate No. 44/GCN-UBCK dated 16 September 2013 and Public Fund Establishment Registration Certificate No. 07/GCN-UBCK dated 24 December 2013 granted by the State Securities Commission ("SSC"). III. MARKET UPDATE DURING THE YEAR

1. Macroeconomics overview

Vietnam's economy witnessed deceleration in 4Q 2022 amid the slowdown of the manufacturing sector, which resulted from weakening global demands. On the contrary, the service sector has maintained a solid growth momentum on the back of the robust recovery in tourism. Another plus point is the improvement in the current account to support VND while food price stability has somehow eased concerns over inflation risks. For the whole year 2022, Vietnam's economy expanded at the fastest pace in 25 years, which is encouraging given global turbulence. Key economic indicators are as below:

- ▶ GDP grew by 5.92% yoy in 4Q 2022 and 8.02% in 12M 2022. The Industrial & Construction sector (+4.22% yoy in 4Q and +7.78% in 12M) was a crucial growth engine, contributing over 38% to the economy's expansion rate in 2022. Manufacturing & Processing remained the sector's key driver (+2.98% yoy in 4Q and +8.10% yoy in 12M) while Mining & Extraction sub-sector gathered pace (+7.93% yoy in 4Q and +5.19% in 12M). The Construction sector still enjoyed growth (+6.69% yoy in 4Q and +8.17% yoy in 12M) on the back of accelerated public investments toward the year-end. The Service sector (+8.12% yoy in 4Q and +9.99% in 12M) became the top contributor to GDP growth with 56.7%, driven by solid performance of Wholesale & Retail services, which increased by 10.15% yoy in 2022 as compared to the drop of 0.21% yoy in 2021.
- ▶ Real retail sales strongly rebounded by 15.6% yoy in 2022 after witnessing a sharp decline by 6.2% yoy in 2021 due to impacts of Covid-19 outbreak.
- ▶ The PMI dipped to 15-month low at 46.4 in December as export-oriented manufacturers scaled back production to cope with falling new orders.

III. MARKET UPDATE DURING THE YEAR (continued)

1. Macroeconomics overview (continued)

- ▶ Exports weakened in 4Q 2022 (-6.7% qoq and -6.6% yoy) and its growth for the whole year declined to 10.5% yoy from 18.9% yoy in 2021. Export value of major items softened, notably Phones & Parts (-21.8 YoY in 4Q, +0.8% YoY in 12M), Computers & Electronics (-3.3% YoY in 4Q, +9.3% YoY in 12M), Textiles & Garments (-8.1% YoY in 4Q, +14.7% YoY in 12M). However, as imports rose by a slower pace (-5.9% yoy in 4Q and +7.8% yoy in 12M), Vietnam recorded a substantial goods trade surplus by US\$12.4bn as compared to US\$3.3bn in 2021.
- ▶ Tourism enjoyed a strong recovery. Vietnam welcomed 1.8m foreign tourist arrivals in 4Q (+41% qoq and 35% of pre-Covid level) and 3.7m in 12M 2022, generating US\$3.8bn to service export revenues. The number of domestic tourist visits also reached all-time high at over 101 million (19% higher than that in 2019).
- ▶ CPI in December cooled down from the previous month due to the drop in fuel prices. On a yearly basis, the price index rose by 4.6%, the highest since March 2020. The acceleration in the last month's inflation was mainly attributed to base effect while prices of key items in CPI basket remained stable. For the whole year 2022, inflation averaged 3.15%, well below the government target of 4%.
- ▶ FDI registered value significantly improved in 4Q (+91.0% qoq; +32.9% yoy) to narrow the YTD drop to 7% yoy. On the bright side, the disbursed value remained robust, growing 7.9% yoy in 4Q and 13.5% yoy in 12M 2022, the highest since 2015.
- ▶ VND appreciated against USD by 1.2% in 4Q to end 2022 with the devaluation by 3.5%.
- ▶ Total bank credit accelerated to increase by 3.5% in 4Q and 14.5% in 12M 2022.

2. Bond market

For the entire 2022, State Treasury completed only 54% the initial plan of VND400 trillion. Tense liquidity, starting from late 1Q and extending to the year end, generated very weak demands. Subscription/Offer recorded historical low of 1.4x in 3Q 2022 and was around 1.9x for the entire year. Throughout the year, only 10 and 15-YR tenors were successfully issued. Under very tense market liquidity and surging exchange rates, yields of all tenors started rallies in 2Q and reached their peak in the first week of November. The market stabilized in the later half of November and yields started going down in December. By the end of the year, the yield curve was nearly flat with yields of 3-5YR tenors were nearly the same (around 4.7%), and just around 10-20bps lower than those of 10-15YR tenors (4.9%). 2022 witnessed the biggest increase in yields, especially of short tenors where 3-5YR surged by nearly 400bps from less than 1% to the peak of nearly 5%. Long and super long tenors recorded a rise of around 230-250bps.

III. MARKET UPDATE DURING THE YEAR (continued)

2. Bond Market (continued)

VND267.7 trillion corporate bonds were issued through private placements in 2022. 72% of the volume was issued in 1H of the year. Decree 65 issued in September 2022 tightened private placements of corporate bonds negatively affected the issuance in 2H of the year. Apart from that, the corporate bond market experienced lots of turbulence in 2022, starting with the arrest of Tan Hoang Minh top management officials for deceiving investors in private placements of corporate bonds in April 2022. The market confidence had been totally eroded after the second arrest of Van Thinh Phat top management officials, also alleged for deceiving investors of corporate bonds, in October 2022. The tense liquidity of the interbank market and increasing policy rates resulted in big jumps in banks' mobilization rates in the final quarter of the year. By end of November, mobilization rates increased by at least 2% for all tenors in all banks. Some banks with liquidity and LDR issues offered rates above 10% for 6M and longer. Market chaos accompanied by the surging banks' mobilization rates resulted in big redemptions of fixed income mutual funds and sell-off of listed bonds on HNX, which significantly pushed up corporate bond yields to 15%-20% for most of 4Q. However, rates calmed down in the final week of December 2022 as a result of administrative orders from SBV. The corporate bond market also gradually regained stabilization and thus yields started cooling down in December 2022, and currently varied within the range of 11-15% depending on issuer.

3. Stock Market

After moving almost sideways in the 1Q, the VNI fell sharply into bear market territory and notched its losing streak in the rest three quarters of 2022. With the negative return of 32.7% in 12M, the VNI was amongst the worst performing indices in the Asia Pacific region in 2022. The drastic decline in last year also marks 2022 as the second worst year of the VNI since its inception, only lower than the 66.0% loss at the time of global financial crisis in 2008.

The slump of the VNI can be attributed to substantial macro headwinds, turmoil in the corporate bond market and margin call pressure:

- ▶ The most prominent macro challenge was the stubbornly elevated inflation and the resulting tightening monetary policy in the US. The US CPI accelerated during the course of 1H 2022 to reach 9.1% YoY increase in June, the largest increase since Feb 1983, and that could be attributable to both supply and demand factors. On the supply side, the war of Russia on Ukraine disrupted supply and accordingly prices of some major commodities including crude oil surged in the 1H 2022. As regards demand side, the strong economy and labor market in the US caused significant upward pressures on prices. To tame inflation, the US Federal Reserve has pursued aggressive monetary tightening. That led to mounting recession concern and thus dampened investor sentiment.
- ▶ The accelerated rate hike in the world largest economy put pressure on global central banks including Vietnam to follow suit. To help the VND hold up against a stronger USD as the US Dollar Index increased by 17.8% for the ytd to 30 September 2022 as a result of Fed's rate hikes, the State Bank of Vietnam (SBV) has been selling USD during the course of the 3Q. Also, the SBV lifted the policy rates twice by 1% each time to support the VND. Those led to liquidity constraint in the banking system. It is worth to note that, the SBV had earlier pursued cautious monetary policy since the 2Q as inflation pressure mounted after the high energy price fed into the domestic economy. Business outlook, across almost all sectors turned grim amid the restrictive monetary policy and tight liquidity. Besides, unfavourable conditions of the currency market raised concerns over currency crisis given the fact that the foreign currency reserve, which was estimated to weaken to the threshold of 12 weeks of imports recommended by multilateral institutions including the IMF.

III. MARKET UPDATE DURING THE YEAR (continued)

1. Stock Market (continued)

- ▶ As regards the corporate bond market, the market had been going through difficult times since the arrest of the chairman of Tan Hoang Minh group in April for corporate bond frauds and later the issuance of the Decree 65/2022/ND-CP on 16 September 2022, which imposed stricter requirements on private placements of corporate bond issuances. The arrest of executives of Van Thinh Phat group (VTP group) in early October dampened investor confidence further. Besides, the VTP group case also led to a serious bank-run at Saigon Commercial JSB, which is the fifth largest bank in Vietnam in terms of loan book and is rumored to be related to the group. That negatively impacted liquidity in the banking system and market sentiment. Consequently and as deposit rate increased following the higher policy rates, investors fled from their corporate bond investments at pace that has never seen in the market before. The panic selling perhaps spread to the equity market.
- ▶ Margin call pressure was clearly another reason that put stock prices down further and sharply, especially when margin loan balance was high. As at the end of 4Q 2021, the total margin loan balance reached VND196.8 trillion, which was significantly higher than the pre-Covid level (1Q 2020: VND50.2 trillion).

The combined trading value (matching and put-through) of HSX, HNX and UPCoM in 2022 approximated US\$213.9 billion (-26.0% YoY). The decline in liquidity could be attributed to investor's prolonged bearish sentiment amid challenges in macro and capital market conditions and to high interest rate, which makes the stock market less attractive to investors.

In 2022, all 12 sectors by GICS classification posted negative returns. Excluding the Not Classified group (-50.9%) and the Communication Services sector (-53.6%), which are small constituents in the VNIndex, the Materials and Real Estate sectors performed the worst with negative returns of -50.3% and -45.9%, respectively. The best performing sector was the Information Technology (-4.1%), chiefly driven by the resilient stock price of FPT Corporation (HSX: FPT).

By market capitalization, in 2022, large-cap and mid-cap stocks had better performances than the small-cap stocks as the VN30 Index and the VN70 Index lost 34.5% and 41.3%, respectively while the VNSmallcap Index decreased by 51.0%.

V. MARKET OUTLOOK

Looking ahead to 2023, high uncertainties remain for both economic growth and economic stability of Vietnam. On the growth front, Vietnam will face considerable headwinds in addition to unfavorable base effect. One is from lower global economic growth and increasing risks of recession in major economies. Another major risk is related to the real estate and related sectors which has been struggling with high interest rates, funding difficulties and legal issues. That being said, tailwinds to support economic growth do exist including: (i) Government's relentless efforts in pushing up public investment, (ii) strong high-quality FDI disbursement during 2020-2022, which will translate into production and export in 2023 and (iii) increasing demand for goods and services, particularly for tourism, resulting from China reopening which may accelerate later this year. All in all, with such high uncertainties, GDP growth forecasts for Vietnam in 2023 vary in a quite large range, from 2.1% to 7.5%^[1] by private agencies and from 6.2% by the IMF, 6.3% by the ADB to 6.7% by the World Bank^[1].

On the stability front, the US inflation is expected to further decelerate in the coming months, opening for the US Federal Reserve (Fed) to be less hawkish and hence, pose less risks on the Vietnamese Dong. That being said, the risk of China bumpy reopening may cause upward pressures on global CPI, which may force the Fed to be more conservative in its monetary policy. Domestically in Vietnam, higher demand from China later in its reopening, the needs to adjust Government-controlled prices (electricity, education, petroleum, etc.) together with increased wage also create upside risks for inflation in 2023. In fact, the Government has relaxed its inflation target to 4.5% for 2023 to open room for economic growth support. With regard to interest rates, although the deposit rates might have peaked as liquidity crunch has been easing, how corporate bond market evolves with significant amount of corporate bonds due in 2023 and how SBV grants the credit quota and manage money supply will be interesting to watch.

V. MARKET OUTLOOK (continued)

Regarding the stock market, challenging environment with high interest rates and weakening demand present substantial headwinds to corporate earnings in the upcoming year and could negatively impact investor sentiment. In fact, earnings expectation has been downgraded sufficiently during the 2H2022. However, we believe significant market drawdown in 2022, to a certain degree, has reflected market's anticipation of economic/corporate earnings weakness in 2023. From business cycle perspective, earnings growth in 2024 is foreseen to be stronger YoY as business conditions are expected to improve. And the stock market in 2023 will lead the favorable earnings growth expectation. More importantly, as structural stories of Vietnam strength persist, downcycles will surely come and go as they did in the past. In the meantime, the current valuation is very compelling. The 2023 forward P/E of the VNIndex is 10.0x^[2], amongst the lowest levels in the last 15 years. In addition, the Vietnamese stock market has never gone through two consecutive years of significant downturn in the past, which should bring in more optimism for the stock market in 2023.

SUPERVISORY BANK'S REPORT

We, appointed as the Supervisory Bank of VCBF Tactical Balanced Fund ("the Fund") for the period from 01st January 2022 to 31st December 2022, recognize that the Fund operated and was managed in the following matters:

- a) During our supervision of the Fund's investments and asset transactions for the period from 01st January 2022 to 31st December 2022, the Fund's investment portfolio deviated from investment limits under the prevailing regulations for open-end fund, Fund Charter, Fund Prospectus and other relevant regulations, details as below:
 - Point e, Clause 04, Article 35, Circular 98/2020/TT-BTC dated 16th November 2020 providing guidance on operation and management of securities investment funds ("Circular 98") and Article 10, Fund Charter regulate that the structure of the investment portfolio of an open-end fund must ensure the following investment limit: "Total value of major investments in the fund's investment portfolio shall not exceed 40% of total value of its assets, except bond funds." In case of deviation, the Fund Management Company has to adjust the Fund's investment portfolio in conformity with the prevailing regulations within the regulated recovery timeframe.

At valuation date 27th April 2022, valuation date 08th June 2022 and from valuation date 29th November 2022 to valuation date 13th December 2022, the Fund's investment in major investments deviated from the limit of 40% of the Fund's total asset value due to price fluctuation of the assets in the Fund's investment portfolio and making payments of the Fund as prescribed by law, including implementation of trading orders of investors.

The Fund Management Company adjusted the Fund's investment portfolio to comply with the prevailing regulations within the regulated recovery timeframe.

At the other valuation dates in the period from 01st January 2022 to 31st December 2022, the Fund's investment portfolio complied with Point e, Clause 04, Article 35, Circular 98 and Article 10, Fund Charter.
